### (54) Title: POLARIZING PLATE AND MANUFACTURING METHOD THEREOF, AND IMAGE DISPLAY DEVICE

(57) Abstract: A method for manufacturing a polarizing plate comprising: bonding an antireflection film containing a transparent support and an antireflection structure including a plurality of layers different in refractive index each comprising a cured film to a polarizing film, wherein at least one layer of the plurality of layers different in refractive index is a layer having a higher refractive index than that of the transparent support and a thickness of 10 nm to 2  $\mu m$ , and the antireflection film is bonded to the polarizing film after being subjected to a hydrophilization treatment so that a contact angle to water of a surface of the antireflection film to be bonded to the polarizing film falls within a range of 20 degrees to 50 degrees.
